## PROFILE

Seeking an opportunity to leverage my skills and knowledge as a recent graduate by contributing to a reputable organization like yours. Experienced in managing research and planning, identifying and solving problems, gathering information, and leading teams to implement effective actions.

## SKILLS

- |            |            |
|------------|------------|
| • Python   | • ChatGPT  |
| • My SQL   | • Canva    |
| • Power BI | • Teamwork |
| • Excel    |            |

## PROJECT

- **Facebook System Login**  
**Python**
  - My project experience predominantly revolves around utilizing Python programming, encompassing modules like Tkinter, various functions, data types, SQL connectivity, and Database Management Systems (DBMS).
- **Blinkit Data analysis**  
**Power BI**
  - Completed a comprehensive Blinkit data analysis project using Power BI, delivering actionable insights and data-driven recommendations.
- **Vrinda Store Annual Data Report**  
**Excel**
  - Conducted a multi-phase project involving data cleaning (filtering and verification), data processing, comprehensive analysis, and generating actionable insights. Developed strategic next steps based on analytical findings to drive business decisions.
